

To whom it may concern

As table 2.3.A IATA Dangerous Goods Regulations regarding Lifejackets

1. Subject to the prior approval of the airline operator each passenger may carry one small carbon dioxide cylinder fitted into a lifejacket plus one spare cylinder as checked in baggage.
2. Each 33g carbon dioxide cylinder is guaranteed and is pressure tested to 250 Bar. Each cylinder is filled to a pressure of 100 Bar at 30 degrees centigrade and has a blast pressure greater than 540 Bar.
